

The Big Mac Slabs team has been busy around the country with both new builds and upgrades to Retirement Facilities. A few of these are featured in this newsletter. The trend to keep seniors active and out walking has meant that there is a greater need for seating in village grounds. The residents have goals to walk to and can take a break when they achieve it. We have developed Park Benches with a bigger footprint so they are more stable and have tilted the seat up at the front so it is easier to get up again. Optional Arm Rests are also available. They are often purchased by residents or their families for a facility and gifted with a plaque. If we can help you with your next project – then talk to The Big Mac Slabs Team!

We have a large range of table settings suited to retirement care and can adjust furniture to suit the facility needs such as wheelchairs. They are very popular for family visits as well as day to day living.

Big Mac furniture has an elastomeric membrane coating designed to cope with NZ's dramatic seasonal changes and a UV inhibitor to reflect heat & sun for better durability. The Macrocarpa timber is sustainably sourced and we promote environmentally friendly practices.

If you are trying to create a more natural retreat environment – then check out our website and talk to us about how we can help. www.bigmacslabs.co.nz
